March 27 jQuery Assignment

Make the calculator functionable as follows:

1. Clear the display and memory when the C button is clicked

2. For all buttons that display a value, show the value in the display when the button is clicked

3. Turn a number into a percent (i.e. fraction of 100) when percent is clicked

4. Switch a number when the +- button is clicked i.e. multiple by -1

5. Display the contents of memory (if any) when the M button is clicked or put the display contents in memory if memory is empty

6. Evaluate the expression when = is clicked
